25 YEARS OF ISOMETRIC™ TECHNOLOGY

Yonex revolutionized racquets by introducing its "ISOMETRIC™" technology, setting a new global standard for the sport of badminton.

1992

ISOMETRIC™: The World Standard, Set by Yonex

The signature Yonex ISOMETRIC™-shaped racquet revolutionized badminton with a greatly expanded sweet spot compared to a traditional oval frame. For the very first time, a square-shaped racquet was designed to maximize the sweet spot by increasing the intersection of main and cross strings.

Originally developed for tennis racquets, Yonex ISOMETRIC™ tennis racquets immediately supported the top athletes in winning major titles. In 1992, Yonex released the first ISOMETRIC™-shaped badminton racquet, the ISOMETRIC 500, and has since incorporated the signature technology in all of its racquets, gaining the trust of the world’s best players.

2017

The ISOMETRIC™ Legacy: Continued Evolution

The sport of badminton changed with the introduction of the ISOMETRIC™ frame shape. With an expanded sweet spot, players were now able to strike the shuttlecock with the upper area of the frame, resulting in higher head speeds and forever changing the pace of the game.

The continued development of the ISOMETRIC™ frame shape with innovative designs and technology has allowed legendary players like Lee Chong Wei (MAS) to smash at 408 km/h, a world record* (as of January 2017). Yonex will continue to propel the evolution of its signature technology, further contributing to the evolution of badminton as a sport.

*Record verified by the Badminton World Federation during the 2016 Hong Kong Open.

DUORA’s cutting edge technology places two unique frame shapes into one revolutionary racquet. Command the court with powerful forehands and equally fast backhands.

Power up your forehand and backhand with the DUAL OPTIMUM SYSTEM. The DUORA series features two contrasting racquet profiles in one unique design. This revolutionary Dual Dynamic Design allows players to enhance each shot while controlling the court. Modern badminton has evolved beyond hard smash and developed a new kind of offense. Rise to the new game standards with the DUORA series that lets you attack with a variety of shots.

HYPER-MG

Hyper-MG is the most elastic graphite material utilized by Yonex. The bottom half of the DUORA Z-STRIKE frame is equipped with Hyper-MG for instant repulsion.

NANOMETRIC DR

NANOMETRIC DR is a graphite material based on unique Nanes NANO SCIENCE technology. Created from a material originally developed for next generation space aviation by Toray Industries, Inc., this marks the first time it has been used within the racquet industry. Firm shuttle hold combined with high repulsion puts the DUORA into a class of its own.

DUORA GROMMET

The new DUORA Grommet design features 8 linked grommets made with differing thicknesses on either side of the frame. On impact the stiffer AERO side grommets pull the string harder, increasing launch power for that crucial shot.

DUORA Z-STRIKE

Carefully crafted to provide control, accuracy, and precision for advanced players. The DUORA Z-STRIKE gives you the power to be offensive on both forehands and backhands, anywhere on the court.

---
VOLTRIC racquets get their immense power and speed from the innovative TRI-VOLTAGE SYSTEM. The system combines intelligent head weighting, frame flex, and aerodynamics to generate explosive force without compromising speed or control.

**POWER:** The stiff structure at the top of the frame allows the head to flex in a controlled way, holding the shuttle on the string bed. The E-tune system allows you to customize the racquet’s weight and balance to fit your style. Power up the TRI-VOLTAGE SYSTEM by attaching weights to the linked grommets, creating your own weight balance to elevate your game.

**AGILITY:** The weight applied to the top of the frame and joint area provides great handling while maintaining head-heavy power. A stiff, high-density vibration-damping material featured in the upper half of the VOLTRIC FB frame, allowing players to hit with a solid feel and power.

---

**VOLTRIC FB**

Lightweight racquet that provides a solid feel and excellent power.

NANORAY racquets make sure the shuttle spends more time in your opponent’s court. The sleek, streamlined frame means it cuts effortlessly through the air while the ultra-stiff X-FULLERENE shaft boosts repulsion power.

- **FULLERENE**

  X-FULLERENE is incorporated into the full length of the shaft to increase stiffness by 6% and repulsion power by 4% – giving you a high repulsion performance to hit deep into your opponent’s court, even with a compact swing during high speed rallies.

NANORAY™

Dominate the court with an aerodynamic and lightning-fast NANORAY racquet.
NANORAY 800
X-FULLERENE combined with SONIC METAL produces a fast and controlled swing that generates powerfully accurate, rapid-fire shots.

Hit your shuttlecock even farther with the GlanZ, which is infused with REXIL FIBER material and rooted in the Torque Power Theory.

NANORAY's revolutionary frame design with TOUGHLEX allows for flexible, all-round attack and defence play.

Devastating speed and acceleration for deeper, faster, clearer shot making.

The Compact Frame allows you to hit fast smashes with ease.

- Colour: Silver/Lime, Dark Gun/Pink
**ISOMETRIC LITE 3**
AERO Frame and ISOMETRIC shape allow for lighter, easier play.

- **ITEM CODE**: ISO-LITE 3
- **FLEX**: Medium
- **FRAME**: Graphite
- **SHAFT**: Graphite
- **LENGTH**: 10mm Long
- **WEIGHT/Grip Size**: 3U (Av. 88g) G4.5
- **STRINGING ADVICE**: 3U 19-24lbs
- **COLOUR**: Red, Cyan, Yellow

**ISOMETRIC TR1**
Full graphite, game improvement racquet with a solid feel and match-like playability.

- **ITEM CODE**: ISO-TR1
- **FLEX**: Medium
- **FRAME**: Graphite
- **SHAFT**: Graphite
- **LENGTH**: 10mm Long
- **WEIGHT/Grip Size**: G4.5 20-30lbs
- **COLOUR**: Snow White

**ISOMETRIC TR0**
Build muscular strength with this all-graphite training racquet.

- **ITEM CODE**: ISO-TR0
- **FLEX**: Medium
- **FRAME**: Graphite
- **SHAFT**: Graphite
- **LENGTH**: 10mm Long
- **WEIGHT/Grip Size**: G4.5 20-30lbs
- **COLOUR**: Cool Black

**B 700MDM**
MEGA Frame with larger sweet spot for deeper shots.

- **ITEM CODE**: B700MDM
- **FRAME**: Aluminium
- **SHAFT**: Steel
- **WEIGHT/Grip Size**: U (Av. 98g) G4
- **STRINGING ADVICE**: U 14-20lbs
- **COLOUR**: White/Gold, White/Blue

**B 6000I**
ISOMETRIC with large sweet spot for power and distance.

- **ITEM CODE**: B6000I
- **FRAME**: Aluminium
- **SHAFT**: Steel
- **WEIGHT/Grip Size**: U (Av. 98g) G4
- **STRINGING ADVICE**: U 14-20lbs
- **COLOUR**: Black/Red, Black/Yellow

**B 4000**
Standard model for light, easy handling.

- **ITEM CODE**: B4000G
- **FRAME**: Aluminium
- **SHAFT**: Steel
- **WEIGHT/Grip Size**: U (Av. 98g) G4
- **STRINGING ADVICE**: U 14-20lbs
- **COLOUR**: Red, Lime

The mesh cover assists shot development by adding air resistance to your swing. This improves strength and gives you the ability to deliver more powerful shots.

**B-SERIES**

- **ISOMETRIC LITE 3**
- **FLEX**: Medium
- **FRAME**: Graphite
- **SHAFT**: Graphite
- **LENGTH**: 10mm Long
- **WEIGHT/Grip Size**: 3U (Av. 88g) G4.5

- **FLEX**: Medium
- **FRAME**: Graphite
- **SHAFT**: Graphite
- **LENGTH**: 10mm Long
- **WEIGHT/Grip Size**: G4.5 20-30lbs
- **COLOUR**: Red, Cyan, Yellow

**AERO Frame and ISOMETRIC shape allow for lighter, easier play.**

**ISOMETRIC TR1**
Full graphite, game improvement racquet with a solid feel and match-like playability.

**ISOMETRIC TR0**
Build muscular strength with this all-graphite training racquet.

**B 700MDM**
MEGA Frame with larger sweet spot for deeper shots.

**B 6000I**
ISOMETRIC with large sweet spot for power and distance.

**B 4000**
Standard model for light, easy handling.
THE YONEX RECOMMENDED STRINGING METHOD

Please check the racquet’s recommended stringing tension and string within that range. Yonex recommends that crosses be strung at a tension 10% higher than the mains. However, it is recommended that the final 5 crosses be strung at the same tension as the mains. Yonex recommends this method as it helps the racquet maintain its original shape after stringing.

**DUO-ZS, VT-FB, VT-GZ, VTZF2, VTIF, VT-F**
NR-ZSP, NR-GZ, NR-ISP, NR-SP, ARC-FB

**MAIN:** Start from top centre, keep on stringing until B9 (skip A7, A9 & A11). Go through B12, directly to A16, and then straight to A14, down to B10 and tie off at B8. (Opposite side: the same procedure)

**CROSS:** Make a knot at B6 and start crosses from B9. Keep on stringing until A7 (skip A12 & A10), then directly to A5 and tie off.

---

**DUO10, DUO7, DUO6, DUO88, DUO77, DUO55, VT80ETN, VT70ETN, VT60ETN, VT50ETN, VT55NEO, NR990, NR890, NR750, NR700FX, NR300NEO, NR95DX, NR70DX, NR10F, NR9, ARC11, ARC6FL**

**MAIN:** Start from top centre, keep on stringing until B9 (skip A8 & A10). Go through B12, directly to A15, and then straight to A13, down to B10 and tie off at B8. (Opposite side: the same procedure)

**CROSS:** Make a knot at B6 and start crosses from B9. Keep on stringing until A8 (skip A11 & A9), then directly to A5 and tie off.

*Make a knot at B6 for VT80ETN*

---

**NANORAY JUNIOR**
A full graphite junior racquet to help hit with ease.

**ITEM CODE** NR-JR
**FLEX** Hi-Flex
**FRAME** Graphite
**SHAFT** Graphite/Nanomesh + Carbon Nanotube
**LENGTH** 25.5 Inches
**WEIGHT/GRIFF SIZE** 4U (Ave. 83g) 07
**STRINGING ADVICE** 4U 14-20lbs
**COLOUR** Blue

**NANOMESH + CARBON NANOTUBE**
**ISOMETRIC**
**AERO Frame**
**Built-in T-Joint**

---

**MUSCLE POWER 2 JUNIOR**
A shorter junior racquet for easy handling.

**ITEM CODE** MP2JR
**FRAME** Aluminium
**SHAFT** Steel
**LENGTH** 21 Inches
**WEIGHT/GRIFF SIZE** 4U (Ave. 83g) 05
**STRINGING ADVICE** 4U 14-18lbs
**COLOUR** Red

**ISOMETRIC**
**MUSCLE POWER Frame**

---

**OTHER RACQUETS**

**MAIN:** Start from top centre, keep on stringing until B9. Go through B12, directly to A11, and then straight to A10, down to B10 and tie off at B8. (Opposite side: the same procedure)

**CROSS:** Make a knot at B6 and start crosses from B9. Keep on stringing until A8 (skip A11 & A9), then directly to A5 and tie off.
RACQUET TECHNOLOGY

Yonex racquets are precisely engineered using technology on a molecular level that’s invisible to the naked eye but make a visible difference to the racquet performance.

The NANOSCIENCE technology allows Yonex to alter the structure of the materials in the racquet to build strength, flex and power exactly where it’s needed. That’s what gives Yonex racquets the leading edge.

**NANOMETRIC β**
Grounded in NANOSCIENCE, this material binds carbon fibres tightly together one-by-one without any gaps, for enhanced strength.

*NANOMETRIC material applies the NANOMETAL technology of Toray Industries, Inc.

**NANOMESH + CARBON NANOTUBE**
Unique structural carbon materials are an integral part of the frames and shafts of the NANORAY racquet series, resulting in sharper handling, greater repulsion power, and increased strength.

**NANOCELL**
Finely mixed nano-sized bubbles greatly reduce impact stress on the racquet, resulting in improved durability.

**MATERIAL**

**REXIL Fiber**
This original high quality material was developed by Yonex to exceed the repulsion and shock absorption properties of normal materials.

**Sound Filter**
Intimidate your opponent with an aggressive sound of a Yonex racquet equipped with Sound Filter. Using material engineered into the racquet frame, the technology filters only the sound required for a powerful and commanding tone during play.

**EX-HMG/SUPER HMG**
This ultra-elastic graphite material increases repulsion, putting sharper power into smashes, drives, clears and many other shots.

**VIBSLAYER CARBON**
VIBSLAYER CARBON is a material incorporated into the bottom-half of the DUORA 6 frame. Made with ultra-thin layers of shock-absorbing material* between layers of carbon, players experience the same level of repulsion power generated by normal carbon with greatly reduced shock impact, cutting down on fatigue and stress on the body.

*NIBSLAYER CARBON utilizes shock-absorbing materials developed by Toray Industries, Inc.

**SONIC METAL**
An ultra-stiff material incorporated into the lower part of the frame. SONIC METAL gives an aggressive snap-back effect, increasing repulsion power and producing an attacking sound.

**TOUGHLEX**
TOUGHLEX is a 'sticky' resin which delivers high flexibility and intensity. High resilience and flexibility help players to hit easy clear shots.

**NICKEL-TITANIUM FIBER**
Contained in the outer-most edge of the DUORA 10’s AERO Frame, this titanium material provides increased stiffness in the racquet frame along with strong form retention, allowing for quick repulsion.

**VIBSLAYER CARBON** utilizes shock-absorbing materials developed by Toray Industries, Inc.

**IC Elastomer**
Found throughout the inside of the DUORA 7 frame, this soft elastomer material increases shuttle hold and accumulates energy.

**LIGHT Feel CARBON NEO**
Combining rubber particles with carbon fibre generates a light feel and flexibility at impact.

**Graphite carbon fibres bound with epoxy resin boost repulsion power and strength.**

**NANOAIR SPRING**
Tiny air pockets in the racquet’s carbon structure act like a spring, providing improved energy transfer from the string-bed to the shuttle for powerful shots.
FRAME

BOX Frame
The BOX Frame has an ultra-stiff profile for a solid feel.

AERO Frame
The AERO Frame cuts air resistance for a faster swing.

AERO+BOX Frame
AERO and BOX Frame profiles are combined on some racquets for a faster swing with a more solid feel.

DELTA POWER FRAME
YONEX applied the technologies of Aerodynamic Shape and Box Shape to the Delta Power Frame, which creates a stable and solid hitting face without sacrificing its power.

AERO+BOX Variframe
Aerodynamic contouring of the top of the frame minimizes air resistance, transferring more speed and power into your shots.

SBZ (Snap Back Zone)
The slimmer section in the middle of the frame incorporates an elastic material called EX-HMG. This allows the frame to flex more on impact, replicating the shuttle at astonishing speeds.

HORIZONTAL-R CONCEPT
This innovative grommet pattern allows strings to run horizontally, creating greater flex in the string bed providing an enlarged sweet spot at the top of the frame, in the smallest head yet.

SOLID FEEL CORE
All Japan-made racquets use a shock-absorbing core to eliminate harmful vibrations travelling through the shaft.

SBZ (Snap Back Zone)
The slimmer section in the middle of the frame incorporates an elastic material called EX-HMG. This allows the frame to flex more on impact, replicating the shuttle at astonishing speeds.

TRI-iBUMPER
The tungsten infused grommet helps maximize contact time between the shuttle and strings, giving more power.

MEGA Frame
Due to its unique large-frame design, the MEGA Frame further enlarges the already large sweet spot provided by ISOMETRIC. Compared with an ordinary racquet, the MEGA Frame provides a 34% larger sweet spot for greater reach and more effective off-centre hits.

DURA Frame
The engineered DURA Frame profile on Yonex aluminium racquets gives them incredible strength and a solid feel.

DX Frame
Features a wider trench to reduce impact shock by distributing weight pressure over a larger area. It is also thicker and able to stretch under pressure so that impact shock is spread over the whole frame.

MEGA Frame
Compared with an ordinary racquet, the MEGA Frame further increases the already large sweet spot provided by ISOMETRIC. The MEGA Frame design has more holes through to the string bed, allowing more flex and creating a wider, enlarged sweet spot.

NEW Grommet Pattern
Our single-pass grommet design has more holes than a conventional racquet for a higher-performance stringing pattern.

VERTICAL-R CONCEPT
The unique grommet pattern allows strings to run vertically through the string bed, adding more flex and creating a wider, enlarged sweet spot.

NEW Built-in T-Joint
Made from lightweight plastic and epoxy resin, the NEW Built-in T-Joint has a foaming agent in the frame core, increasing the stability of the shuttle on the string bed.

T-ANCHOR
The T-ANCHOR increases stiffness for a faster recovery.

SHAFT

Slim Shafts
Yonex Slim Shafts with added flex are designed to slice effortlessly through the air to generate extra power.

Ultra PEF
Yonex shafts are constructed using lightweight Ultra Poly Ethylene. Fibres that can withstand immense forces while absorbing unwanted shocks and vibrations.

DUAL WHIP-BACK SHAFT
Sharpening gradually from the joint to the cap, Yonex presents its first tapered shaft, which features 2 kick-points to extend the shuttlecock’s flight. The first kick-point at the cap grants players an accelerated swing, while the second is made of an elastic material, allowing for increased bending. The design produces a longer shuttle hold time and heightened transfer of power.

CAP

Control Support Cap
Wider flat surface for more grip and better control.

TFA CAP
Provides extra shaft flex to accelerate frame recovery after impact. Also provides vibration dampening along with a comfortable fit for your thumb.

POWERMUSCLE Frame
A unique mix of stiff and flexible materials used in the POWER BOOST CAP generates additional power without losing stability.

Vibration Filter Cap
Cap shape and material reduces unwanted vibrations to deliver clean shots.

STRINGS

Yonex strings are engineered and developed in Japan to the highest standards, maximizing your racquet’s potential.

HYBRID COMBO FOR QUICK REPULSION AND PIERCING SPIN

The first ever hybrid string combo from Yonex gives you more ways to seize the advantage in high-speed matches. The new AEROBITE applies heavy spin for decisive cut smashes or a solid touch on hairpins. Diversify your game and dominate the court.

CUP-STACK CARBON NANOTUBE Advanced construction minimizes notching of the string at the intersections, for greater durability and high repulsion power.

Braided Structure Braided threads around the main core thread create a robust string structure, allowing it to return back to its original position after impact for more power and repulsion on the shuttlecock.

Vectran+ The Vectran+ high-strength and high-elasticity spiral winding prelions durability and racquet stringing tension.

Rough Braided Structure Threads of varying thicknesses are braided around the main core thread resulting in a bumpy surface, improving performance on hairpins and cut smashes.}

Hydro Titanium Compound titanium hybrid coating provides not only a sharp feel at impact but increased durability.

Polyurethane Coating This tacky coating provides increased hold on the shuttlecock preventing many bad shots at the moment of impact for improved control.

Multifilament Yonex multifilament features a super-fine diameter for high durability and a soft feel on impact.
The Yonex Stringing Team provides global support to the world’s best players.

The Yonex Stringing Team is a global network of stringers rich with knowledge and proven skills. To provide the best performance possible alongside exceptional service, the team strives tirelessly to sharpen its expertise and techniques. Across tennis, badminton and soft tennis, the Yonex Stringing Team boasts over 700 members worldwide, and is the only team in the world to service global tournaments in these three sports combined*. Harnessing this vast network, the Yonex Stringing Team supports the world’s top players with the best stringing service.

The Yonex Stringing Team provided services to 9 out of 13 BWF Superseries Tournaments in 2016.

*Research by Yonex.

The high-performance Yonex PT8 Deluxe stringing machine is specially made to meet the demands of the world-class Yonex Stringing Team. The machine allows our highly-skilled technicians to string with the utmost of accuracy so players can compete at their highest level at tournaments. The new PT8 Deluxe features design improvements focusing on the four elements critical to carrying out high-quality stringing.

**ELECTRIC BADMINTON, TENNIS, & SOFT TENNIS STRINGING MACHINE**

**PT8 DELUXE**

**ITEM CODE:** PT8DXW

**SIZE:** Approx. 1050mm (W) x 500mm (D) x 1080 - 1270mm (H)

**WEIGHT:** Approx. 56kg/123lbs

**MADE IN JAPAN**

**AERO COVER**

**ITEM CODE:** PT8DXC

**MADE IN JAPAN**

*The PT8 Deluxe features an upgraded clamp, with a thinner and more ergonomic design. The new clamp is shorter than in previous models, offering a great improvement in workability.

**BADMINTON EXCLUSIVE MANUAL STRINGING MACHINE**

**Stand Type**

**ITEM CODE:** ST-700EX

**SIZE:** Approx. 950mm (W) x 650mm (D) x 1100mm (H)

**WEIGHT:** Approx. 74kg/163lbs

**Table Type**

**ITEM CODE:** ST-700EX

**SIZE:** Approx. 750mm (W) x 330mm (D) x 470 – 520mm (H)

**WEIGHT:** Approx. 22kg/49lbs

**PRECISION: COMPUTER UNIT**

- The conductivity of the touchscreen has been improved.
- The system has added an option to set tension in 0.5kg increments while retaining the 0.2kg option from the previous model, allowing for even more precise stringing.

**EFFICIENCY: TENSION HEAD**

- The drum has been made smaller and positioned closer to the turntable to reduce the amount of string used, improving stringing efficiency.

**STORAGE SPACE: STRING RAIL & AERO COVER**

- A rail placed under the work table creates a practical storage space for rolls of string.
- Sold separately from the main machine, an Aero Cover can be applied to the stringing machine, conveniently expanding storage space.

**WORKABILITY: CLAMP**

- The PT8 Deluxe features an upgraded clamp, with a thinner and more ergonomic design. The new clamp is shorter than in previous models, offering a great improvement in workability.

*Research by Yonex.*
SHUTTLECOCKS

Crafted with exacting detail and to the strictest criteria, Yonex shuttlecocks are made to provide reliable swift recovery, pinpoint accuracy, and stable flight. Recognized globally for this high quality, Yonex officially supplied shuttlecocks to 9 of the 13 BWF Superseries tournaments in 2016.

The Yonex shuttlecock was the official shuttlecock of the following international tournaments in 2016:

**BWF Events**
- BWF World Junior Championships (Bilbao, Spain)
- YONEX Korea Junior Open Badminton Championships

**Molten BWF World Superseries Premier**
- YONEX All England Open Badminton Championships SSP
- Indonesia Open SSP
- YONEX Denmark Open SSP
- Dubai World Superseries Finals

**Molten BWF World Superseries**
- YONEX-SUNRISE India Open SS
- Australian Badminton Open SS
- YONEX OPEN JAPAN SS
- YONEX French Open SS
- YONEX-SUNRISE Hong Kong Open SS

**BWF Grand Prix Gold Series**
- Syed Modi International Badminton Championships GPG
- Princess Sirivannavari Thailand Masters GPG
- YONEX German Open Badminton Championships GPG
- YONEX Swiss Open GPG
- YONEX Open Chinese Taipei GPG
- YONEX US Open Badminton Championships GPG
- Thailand Open GPG
- Bittbürger Badminton Open GPG
- YONEX-SUNRISE Indonesian Masters GPG

FEATHER SHUTTLECOCKS

Yonex has been painstakingly hand making the best feather shuttlecocks in the world since 1965. Each of our shuttlecocks is assembled by a team of expert craftsmen using only the finest materials. They are then individually tested to make sure they deliver consistent flight trajectory, accuracy and distance at all temperatures. That’s why the best players and the biggest tournaments in the world choose Yonex shuttlecocks.

Always store shuttlecocks away from high temperatures and keep the tube upright with the cork side of the shuttlecock facing down.

NYLON SHUTTLECOCKS

Yonex precision MAVIS Nylon shuttlecocks are the closest you can get to traditional feather. Designed to have the same flight time as a feather shuttle, they give an accurate and durable performance with a traditional feel.

WING RIB™

The WING RIB design utilizes air flow through the shuttlecock to restore shape quickly on impact. Based on flight dynamics, this original design grants stable flight, contrary to conventional models that restore shape via stiff construction.

The WING RIB design is featured in MAVIS 2000 and MAVIS 600.

The hardness of the skirt – the feather part of the nylon shuttlecock – varies depending on temperature.

SHOES

Developed, designed and tested year after year to demanding standards, Yonex shoes help you get the best out of your footwork; giving you outstanding performance, dependability and comfort.

POWER CUSHION

All Yonex footwear is equipped with POWER CUSHION Technology, which absorbs shock and smoothly reverses the impact energy into your next movement. Gentle yet durable, a raw egg can be dropped from seven meters above a POWER CUSHION mat, rebounding to a height of four meters without breaking.

- Absorbs shock and reverses impact energy
- Smooth energy transfer into next movement
- Lightweight for comfort
- 3 times more shock absorption than Urethane

3-Layer POWER CUSHION

Higher density top and bottom layers help the 3-layer POWER CUSHION absorb 30% more shock than original POWER CUSHION.

- 30% more shock absorption than original POWER CUSHION
- Converts shock energy into power for fast and light footwork

POWER CUSHION 03 Z MEN

Newly designed upper provides remarkably improved fit and stability.

ITEM CODE: SHB03ZM
COLOUR: Coral Red

POWER CUSHION 03 Z LADIES

Newly designed upper provides remarkably improved fit and stability.

ITEM CODE: SHB03ZL
COLOUR: Light Blue

POWER CUSHION 03

Newly designed upper provides remarkably improved fit and stability.

ITEM CODE: SHB03
COLOUR: Blue/Lime, White/Black, Navy/Turquoise

Durable Skin

Strong material with varying stiffness in key areas of the forefoot provides both stable support and soft comfort.

Flexion Upper

Asymmetric design with a curved eyelet creates a natural snug fit around the inner arch.

Inner Bootie

Tongue connected with shoe opening reduces overlapping layers for a more snug fit.

TPU Support

Elongating the TPU section reinforces the foot during quick, harsh lateral movements.

STABILITY

**Full Cushion Sole+5**

Taking the shock-absorbent properties and high repulsion of the POWER CUSHION to the next level, Full Cushion Sole+5 features POWER CUSHION throughout the entire midsole. This increased level of cushioning results in reduced stress on the ankle and heel for a pleasant fit.

**3D Power Graphite Sheet**

3D Power Graphite Sheet is equipped to provide robust reinforcement under and outside the centre of the foot, reducing shoe twist.

**Toe Assist Shape**

A toe-centric design that cuts down on pressure in the big toe, as well as offering improved support at the mid-foot and heel for a stable fit. Power loss is reduced, allowing for swift footwork.

**Upper**

- **ToughGuard III**: Extremely durable wear-resistant synthetic leather.
- **Durable Skin**: A polyurethane material offering improved high shape retention, wear-resistance and heat-resistance.
- **Double Russel Mesh**: Highly breathable open mesh.
- **Lateral Shell**: Installed on the outer area of the upper, it prevents sliding at the edge of the sole. It reduces power loss, increases footwork response and creates smooth, fluid and offensive movement.

**Midsole**

- **ToughBird Light**: The new ToughBird Light offers an 11% drop in weight from the previous ToughBird, while maintaining its cushioning, shape retention and high elasticity.
- **HypermsLite**: Features a 10% reduction in weight over the past Super Feather Lite midsole material, while preserving a consistent shape over a long period of time.
- **Power Graphite Lite**: A graphite plate placed under the metatarsus for reduced weight as well as stability on landing.

**Insole**

- **Synchro-Fit Insole**: Offering extra support around the front of the heel and reducing the gap between the foot and shoe, the Synchro-Fit Insole ensures maximum grip and improves comfort and performance.

**Sole**

- **Hexagrip**: For agile and stable footwork, the Hexagrip pattern provides 3% more grip and is 20% lighter than standard sole material.
- **Round Sole**: The Yonex Round Sole is designed to provide all-round support for quick and smooth footwork. The Round Sole ensures smooth movements and the transfer of maximum energy.

RUNNING SHOES

SAFERUN 310 TECHNOLOGY
Mid Contact Design: Ideal for Light Runners
POWER CUSHION equipped from forefoot to midfoot allows for maximum shock absorption at the point of impact. The shock impact is converted into energy with every next step.

Spiral Wrap
A combined tongue and upper reduces creasing and firmly secures your foot.

SAFERUN 310 MEN
For runners who prefer a lightweight shoe.
ITEM CODE: SHR310M
COLOUR: Bright Orange, Cobalt Blue, Black
WEIGHT: 245g/8.6oz (per shoe at size 26cm)

Upper: Artificial Leather, Resin
Outsole: Rubber
Midsole: Resin
Insole: POWER CUSHION

TECHNOLOGY: POWER CUSHION, Mid Contact Design, Flexion Upper, Spiral Wrap, Durable Skin Light, Hyper msLite, Arch Former, Power Cushion Insole

SAFERUN 310 LADIES
For runners who prefer a lightweight shoe.
ITEM CODE: SHR310L
COLOUR: Rose Pink, Cobalt Blue
WEIGHT: 200g/6.7oz (per shoe at size 23.5cm)

Upper: Artificial Leather, Resin
Outsole: Rubber
Midsole: Resin
Insole: POWER CUSHION

TECHNOLOGY: POWER CUSHION, Mid Contact Design, Flexion Upper, Spiral Wrap, Durable Skin Light, Hyper msLite, Arch Former, Power Cushion Insole

SAFERUN 800X TECHNOLOGY
Smooth Navi 2.0:
Smooth and Stable Landings
SAFERUN 800X changes shape at the point of impact, delivering a smooth and stable landing.

Inner Bootie
The interconnected tongue and shoe opening reduces overlapping layers for a snug, more streamlined fit.

SAFERUN 800X MEN
A stable shoe for joggers who are concerned about their knees.
ITEM CODE: SHR800XM
COLOUR: Coral Red, Dark Navy, Bright Yellow
WEIGHT: 300g/10.6oz (per shoe at size 26cm)

Upper: Artificial Leather
Outsole: Rubber
Midsole: Resin
Insole: POWER CUSHION

SAFERUN 810 MEN
A stable shoe for serious runners who are concerned about their knees.
ITEM CODE: SHR810M
COLOUR: Blue/Lime, Black/Grey
WEIGHT: 295g/10.4oz (per shoe at size 26cm)

Upper: Artificial Leather
Outsole: Rubber
Midsole: Resin
Insole: POWER CUSHION

SAFERUN 810 LADIES
A stable shoe for serious runners who are concerned about their knees.
ITEM CODE: SHR810L
COLOUR: Silver/Orange, Black/Pink
WEIGHT: 260g/9.2oz (per shoe at size 23.5cm)

Upper: Artificial Leather
Outsole: Rubber
Midsole: Resin
Insole: POWER CUSHION

TECHNOLOGY: POWER CUSHION, Toe-Light Design, Full Cushion Sole+S, Smooth Navi, Hyper msLite, Flaxion Upper

SAFERUN 800X LADIES
A stable shoe for joggers who are concerned about their knees.
ITEM CODE: SHR800XL
COLOUR: Aqua Mint, Coral Pink
WEIGHT: 260g/9.2oz (per shoe at size 23.5cm)

Upper: Artificial Leather
Outsole: Rubber
Midsole: Resin
Insole: POWER CUSHION

Muscle Power Supporter

The new MUSCLE POWER SUPPORTER equipment from Yonex integrates harmless silicon to comfortably and firmly fit each joint and muscle. The combination of tape and silicon firmly embraces joints while moderately compressing muscle fibre and gently supporting ligaments against rapid movement.

ELBOWS
Moderately compresses tendons to cushion impact on elbows.
ITEM CODE: MPS-70ELLEX
COLOUR: Black/Blue
SIZE/LENGTH: S/20-23cm
M/24-27cm
L/28-30cm
MATERIAL: Chloroprene, Silicon, Nylon

WRISTS
Controls hyper-extension of ligaments.
ITEM CODE: MPS-60RIEX
COLOUR: Black/Blue
SIZE/LENGTH: M/L: 13-16cm
L/17-20cm
MATERIAL: Chloroprene, Silicon, Nylon
RIGHT SIDE: M/R-M, L/R-L
LEFT SIDE: M/L-M, L/L-L

KNEES
Applies pressure on patella and supports knees. Easy to slip on/off with adjustable compression, with a mesh structure for ultimate comfort.
ITEM CODE: MPS-80SKEX
COLOUR: Black/Blue
SIZE/LENGTH: S/29-32cm
M/33-36cm
L/37-40cm
MATERIAL: Chloroprene, Silicon, Nylon

ACHILLES TENDON
Firmly wraps and protects Achilles tendon.
ITEM CODE: MPS-30ACEX
COLOUR: Black/Blue
SIZE/LENGTH: S/19-20cm
M/21-22cm
L/23-24cm
MATERIAL: Chloroprene, Silicon, Nylon

ANKLES
Firmly holds ankles in place and protects ligaments from rapid movement.
ITEM CODE: MPS-40AKEX
COLOUR: Black/Blue
SIZE/LENGTH: S/19-20cm
M/21-22cm
L/23-24cm
MATERIAL: Chloroprene, Silicon, Nylon
RIGHT SIDE: S/R-S, M/R-M, L/R-L, LL/R-LL
LEFT SIDE: S/L-S, M/L-M, L/L-L, LL/L-LL

Muscle Power Supporter products are designed for sports application and not intended to provide support or benefit for daily use.
OVER GRIPS

Since its launch in 1987, the AC102EX has become Yonex best-selling over grip, having sold enough grips to wrap three times around the earth. Yonex AC102EX Super Grip enhances the playability of your racquet by absorbing shock and moisture to give you outstanding levels of feel and control.

**SUPER GRAP**
- Tacky feel
  - Item Code: AC102EX
  - Width: 28mm
  - Thickness: 0.6mm
  - Material: Polyurethane

**WAVE GRAP**
- Tacky feel & rubber central strip
  - Item Code: AC103-3EX
  - Width: 28mm
  - Length: 1,200mm
  - Thickness: 0.6mm
  - Material: Polyurethane + Natural Rubber

**MESH GRAP**
- Excellent tacky feel & absorbent
  - Item Code: AC105EX
  - Width: 25mm
  - Length: 1,200mm
  - Thickness: 0.4mm
  - Material: Polyurethane

**HI SOFT GRAP**
- Moist feel & high water absorption
  - Item Code: AC110EX
  - Width: 25mm
  - Length: 1,200mm
  - Thickness: 0.6mm
  - Material: Polyurethane + Silica

**DRY TACKY GRAP**
- Moist feel & improved grip
  - Item Code: AC111EX
  - Width: 25mm
  - Length: 1,200mm
  - Thickness: 1.6mm
  - Material: PVC

**STENCIL CARD**
- Item Code: AC184EX
  - Length: 780mm
  - Width: 7mm
  - Material: Polyurethane

**ABSORBENT SUPER GRAP**
- Tacky feel & enhanced absorption
  - Item Code: AC112EX
  - Width: 25mm
  - Length: 1,200mm
  - Thickness: 1.6mm
  - Material: Polyurethane + Calcium carbonate

**TWIN WAVE GRAP**
- Excellent tacky feel & twin rubber central strip
  - Item Code: AC115EX
  - Width: 25mm
  - Length: 1,200mm
  - Thickness: 0.6mm
  - Material: Polyurethane + Natural Rubber

**HI TACKY GRAP**
- Super soft feeling for maximum comfort.
  - Item Code: AC121EX
  - Width: 25mm
  - Length: 1,200mm
  - Thickness: 0.6mm
  - Material: Polyurethane

**PREMIUM GRIP COMFORT TYPE**
- Easy gripping with high cushioning efficiency
  - Item Code: AC122EX
  - Width: 25mm
  - Length: 1,200mm
  - Thickness: 1.6mm
  - Material: Polyurethane, Forming Urethane

**STENCIL INK**
- Item Code: AC141EX
  - Length: 27m
  - Width: 7mm
  - Material: Polyurethane

**OTHERS**

**WAVE GRAP**
- Tacky feel & rubber central strip
  - Item Code: AC102EX
