

For Immediate Release

Yonex Introduces The NEW *Cyberstar C280 FL Wood* *For Ladies*

Torrance, CA – January 13, 2006: The Cyberstar C280 FL Woods will be added to the successful Cyberstar product line from Yonex Corporation. The Cyberstar C280 FL Woods feature a Maraging steel head with *Muscle Power Face Technology* for unmatched distance and forgiveness. The Cyberstar C280 FL Woods comes equipped with a *Centrifugal Force System (CFS)* shaft. This advanced proprietary Yonex technology provides increased club head speed and additional shaft stability.

The *Muscle Power Face Technology* incorporated in the Cyberstar C280 FL Woods pushes C.O.R. to the limit providing superior distance while maintaining tight shot dispersion. A thicker central “Power-zone” area with radiating spokes has been engineered into a thinner and “hotter” clubface. At impact the club face reacts like a trampoline to generate “supercharged” power and extra distance.

A strategically placed Tungsten Insert lowers and deepens the clubs center of gravity for improved distance and a higher initial launch angle. The Tungsten Insert along with the NEW low drag sole design helps square the club face at impact, reducing slicing and promoting a “draw bias” shot pattern.

Centrifugal Force System (CFS) further increases club head speed by using the most powerful force on earth to help all golfers: GRAVITY. Without an increase in overall shaft weight Yonex engineers have reduced weight at the grip end of the shaft and shifted it to the tip end of the shaft, allowing for greater club head acceleration through the ball when the shaft reaches the bottom of the “swing arc”. This innovative design capitalizes on gravity to optimize the natural speed in the golf swing.

Retailing for \$229.00, the Cyberstar C280 FL Woods come equipped with a high quality Yonex carbon graphite (CFS) Ladies Flex shaft.

The Cyberstar C280 FL Woods are available in Driver, 3 wood, 5 wood, 7 wood and 9 wood

Specifications: Cyberstar C280 FL Woods

| | Shaft Flex | Loft | Lie | Length |
|-----|------------|-------|-------|--------|
| #1w | Ladies | 12.0° | 59.0° | 43.0" |
| #3w | Ladies | 18.0° | 59.5° | 42" |
| #5w | Ladies | 21.0° | 60.0° | 41" |
| #7w | Ladies | 24.0° | 60.5° | 40.5" |
| #9w | Ladies | 27.0° | 61.0° | 40" |

- **Head/Body Material:** Maraging Steel /Muscle Power Face
- **Shaft Material:** Yonex Carbon Graphite, CFS
- **Shaft Flex:** Ladies Only
- **Left Handed:** Not Available
